Dear Parents & Guardians,

I am writing to you today to share an exciting opportunity for our children. I have already introduced the new Learning Futures Student Leadership Programme during an assembly, and I know that many of our children are keen to apply. I have included some information about the programme for your information below.

The programme will involve the selected children completing training, so that they can support staff and peers day-to-day and work on Learning Futures related projects and clubs. Our Digital Leaders will visit other schools and will take part in workshops at the Apple Store amongst other exciting opportunities. Joining our Digital Leader Programme offers numerous benefits for our children. Firstly, they gain a solid foundation in digital literacy, enhancing their ability to navigate and utilise technology effectively. These skills not only prepare them for future academic and professional pursuits but also empower them to assist their peers and teachers in integrating technology into our learning environment. Moreover, the program will foster leadership qualities as children take on responsibilities to share their newfound knowledge, creating a collaborative community within the school. Ultimately, by honing iPad skills and leveraging them to help others, our children will become not just consumers but contributors to the digital landscape.

We are going to initially select 10 Digital Leaders from across the school to embark on their journey to becoming a Digital Genius. Applicants will need to be passionate about technology and be prepared to work collaboratively. It will require dedication and it may involve some work at home and during some lunch times. Applications can be made via the QR code below and are sent directly to the ATLP.

I look forward to seeing who I will be working with on this exciting project and welcome all who wish to, to apply.

Kind regards,

Dan Rowlands
Deputy Headteacher
